Provider use depends on the deployed configuration. The service supports Hetzner hosting, configured Zoho/ZeptoMail email, map providers and optional AI/search or mobile notification integrations. Capability does not mean a provider is active or receives data. Request the current deployment-specific list, legal entities, processing purposes, locations and transfer safeguards from info@xanderfiber.com. A provider must be covered by the customer's documented authorization before processing customer-controlled personal data. Live card-payment and Peppol delivery are not included in the current service.
